

UC BERKELEY EXPERT PANEL

The Zika Virus

The Zika virus has been spreading rapidly throughout Latin America, with numerous implications for global public health. Join a discussion with some of the country's top experts in infectious disease and epidemiology at UC Berkeley about what we know about the virus, what we can expect as infections increase, and how we should be addressing the Zika virus both at home and abroad.

PANELISTS:

Dr. Art Reingold, MD

Professor and Head of Epidemiology, UC Berkeley School of Public Health (SPH)

Dr. Caitlin Gerdt, PhD, MHS

Senior Associate, Ibis Reproductive Health

Dr. Lee Riley, MD

Professor of Epidemiology and Infectious Diseases; Chair, Division of Infectious Diseases and Vaccinology, UC Berkeley SPH

Dr. Eva Harris, PhD

Professor, Division of Infectious Diseases and Vaccinology; Faculty Director, Center for Global Public Health, UC Berkeley SPH

Dr. Brenda Eskanazi, PhD

Professor of Epidemiology; Center for Occupational and Environmental Health, UC Berkeley SPH

Moderated by: **Lisa Aliferis**, Editor, State of Health, KQED News

Co-sponsored by the Center for Latin American Studies, the UC Berkeley Center for Global Public Health, and the Henry Wheeler Center for Emerging and Neglected Diseases.
